

ABOUT TROOST

In 2013 we brewed beer for the first time in our first brewery in a former monastery on the Cornelis Troostplein in the Amsterdam Pijp.

We now have three brewpubs, two of which have a brewery in the building. There we make award-winning organic beers and a number of delicious soft drinks. We also distil gin and Jenever from the beer that remains. We make everything ourselves in the most beautiful places in the middle of Amsterdam. Not at all efficient of course, but all the more fun.

PEOPLE PLANET PILS

At Troost we are convinced that in everything we do we should try to harm other people and the environment as little as possible.

For example, we draw attention to biodiversity with our own bee population, we separate and recycle all our waste, we reuse residual energy, we adapt our packaging to create less waste and we minimize our transport movements.

We have been producing completely organic since the end of 2019. As a result, we can be sure that our ingredients have been grown with an eye for flora and fauna by farmers who have the same approach as us.

WHY WE CAN

Cans are lighter and more compact than disposable glass bottles. They require less energy to produce and the aluminum they are made of can be recycled indefinitely without any loss of quality.

Cans can also be stacked much better, which means that we, as well as our suppliers, save more than 40% on our transport movements and therefore also a lot on CO₂ emissions. Because they are light and airtight, cans are also much better for the beer and on top of that, cans get cold quickly in the refrigerator.

In short: cans are better for the environment and better for our beer!

FOOTPRINT

At Troost we prefer to keep our carbon footprint as low as possible.

That is why we do not do long transports, but we brew everything locally and, with our sustainable partner Rederij Kees, we deliver our beers to local retailers and catering establishments in the greater Amsterdam region. In this way, we not only limit our CO₂ emissions, but also keep control over the freshness of our beer. This way, our beer always tastes like it tastes at our brewery.

For example, our beer always tastes like it comes straight from our brewing tanks and that is the best.

TOURS

Of course we like to show you how we make our beer, so you can take a tour in our brewery in the Westergasfabriek!

Every Saturday we organize a full tour through our stainless steel jungle and afterwards you will of course take a can of beer home!

ABOUT US

In 2013 we started brewing in our first brewery in the Pijp (Amsterdam neighbourhood). Since then we've made award-winning beers, soft drinks and from leftover beer, we distill gin and jenever (Dutch gin). Our breweries are located in beautiful historic buildings on several sites in Amsterdam. For our production we use our own facilities and use locally grown, organic ingredients. Which is, of course, better for us and our planet. Doing so is definitely not the easy route but all the more fun!

TAKE IT AWAY

6-PACK GIFTBOX (CANS) FOR € 15,00

PEOPLE PLANET PILS

ORGANIC

Since December 2019 our brewery has become fully organic. Which means that the raw materials used in our beers must meet strict requirements. Organic farmers stimulate the biodiversity of the ecosystem when they control pests with natural enemies. By doing so, they stimulate a living culture of microorganisms, which results in rich and healthy soil. Other than conventional agriculture, organic farming supports the natural environment, maintain its balance and is therefore the most sustainable choice for the environment. From the quality of our beer you can already tell the difference, but to us, beer tastes even more delicious when we know it came from a good place. Giving us more than enough reason to fully switch to organic production.

HONINGBLOND

While bees are responsible for a great part of our life on earth, wild bees are having great trouble surviving. Tragically, some species are on the verge of extinction. According to Einstein, bees are so important for life on earth, that humankind will not outlast this species for longer than four years. But it's not too late: the bee population can be highly improved if we'll green up and create more bee habitat in urban areas. So, whenever you order our Honey Blonde beer, you'll help this cause too. For every glass we'll contribute to projects aimed at improving biodiversity in our cities. We even have our very own colony of bees living on our brewpub's patio in De Pijp. Come over for a meet & greet!

MEAT

We purchase our meat from farmers who treat their animals with respect and who also take great care of nature. The chicken we serve is organic and the fish we use has the most strict environmental quality mark (www.msc.org). Our porc is bought at Livar (www.livar.nl). Their farm is situated on a 3-star monastery in Limburg, where their pigs can freely roam the lands. Moreover, all our beef comes from our eco-friendly cow farmer Gijs (www.ouderkerksblond.nl), who takes premium care of his cows and calves.

In addition we offer more and more high quality vegetarian food. We are very proud of the fact that more than 60% of our main dishes are veggie or vegan (or can be ordered so). Because, in the end, the most sustainable meat is not eating meat at all!

OUR CIRCULAR & SOCIAL MISSION

We strive to be self-sufficient and reduce our carbon footprint as much as possible. So yes, naturally this means we're powered by renewables. However, it doesn't end there. We re-use the energy from our cooling water to brew new beers. We deliver our beers throughout the city in small cars running on renewables or biogas. We are a certified training company for people who need a little help finding their way back into the labour market. Besides that, we reuse as much as we can from the 'left over' materials of our brewing process. We produce gin & jenever from our byproducts, bake bread from the leftover grains. The remaining grains are fermented to generate electricity.

GLASS & CANS

The reason why there is no deposit on our beer bottles and cans is that cleaning the many bottles we fill costs a terrible amount of time, water and above all, chemicals. That is why you dispose of our beer bottles in the glass container. Glass will be returned to the factory, where we recycle it into new bottles. Back in the old days this system used to be a bit cumbersome, although it's very efficient!

In the last couple of years we have gradually transitioned from glass bottles to aluminum cans. Cans are lighter and easier to chill, can be transported more efficiently and the aluminum is easier to recycle than glass. Because cans are airtight and do not admit light, cans will keep our beers fresh much longer. So they are not only the more sustainable option: they also improve the quality of our product.

THE STREETSMART PROJECT

During the months November and December you can support StreetSmart by dining with us. StreetSmart is an international initiative which supports projects for the homeless, for families who end up on the street and for people suffering from mental issues. Since we care about this wonderful project all year round, we have decided to invite a family over for dinner at our brewery every month. These people normally cannot afford to visit a restaurant. For us this is a small gesture, for them it's a great night out!

PUBQUIZ

NOW ALSO: ON THE TERRACE WITH SILENT DISCO HEADSETS

This is your chance at putting all that senseless knowledge you possess to good use. Monday evenings we're organising the Troost Pubquiz in our Oud-West location! With teams consisting of 2 to 5 people you answer questions during several rounds. The theme is communicated well in advance through our social channels so be prepared! Taking part in the quiz is completely free of charge and as a reward to the winners we'll tear up your tab. Free booze! Even the losers have been thought of and can win a portion of bitterballen as a consolation prize.

Every Monday we start off at 20:00 and we are up and at 'em until 22:30. Bookable everywhere! Online, on Facebook, by phone or by email and let us know with how many people you'll come, at what time and if you'd like to eat (dinner or snacks) beforehand. More than 5 people in a team is possible but will cost you serious penalty points. :) We now offer quizzes on our heated and covered terrace with silent disco headphones! Extra fun!

Please be aware that our quiz is always in Dutch

CONTRACT BREWING

At Brouwerij Troost Westergas we reserve space for other brewers who have little or no boilers of their own and need to upscale (or start) production. We're happy to have you because the more beer, the merrier!

DISTILLING & BARRELAGING

Our brewery in De Pijp has oak barrels in storage that were previously used to ripen American bourbons. We have currently filled them with Barleywine or distillates from our own brewed beers so that our liquors absorb the flavors and aromas of the bourbon infused wood. It takes at least 6 months of patience before you'll get the results we're aiming for, but it's well worth the wait! Our distillates are developed together with the [De Tweekoppige Phoenix](#) distillery on the Zaandse Schans.

GUIDED TOURS

Of course we would like to show you how we make our beer, so you can take a tour in our brewery in the Westergasfabriek! Normally you can get a full tour through our stainless steel jungle every Saturday for € 8,- and of course you can take home a can of beer afterwards! Always check in advance whether the tour takes place via westergas@brouwerijtroost.nl
